

LAYSA SANTIAGO ALFREDO

PRODUCT DESIGNER | UX/UI DESIGNER

Tubarão, SC, Brazil | +55 (48) 99831-0464 | laysatb@gmail.com | Portfolio: laysasanha.github.io/portfolio-laysa | LinkedIn: linkedin.com/in/laysa-santiago-alfredo

PROFESSIONAL SUMMARY

Product Designer with 5+ years of experience creating and evolving web and mobile digital products for companies across multiple industries in Latin America (Brazil, Uruguay, and Chile). Skilled at connecting product strategy, user needs, and technology, from UX research to validating layouts in production alongside development teams, spanning user journeys, prototyping, and Design Systems. Additional experience mentoring designers and applying AI tools (Claude Code, ChatGPT) to optimize design processes.

PROFESSIONAL EXPERIENCE

Mid-Level UX/UI Designer | Minha Entrada 2022 – Jul 2026

Digital products for Brazil, Uruguay, and Chile: fan membership apps, financial systems, event platforms, and internal management solutions. Promoted internally after internships in Web Programming and UX/UI Design at the same company.

- Led the complete redesign of the fan membership app, used by more than 12,000 fans across multiple clubs (including over 8,000 active paying members in Criciúma and Figueirense alone), restructuring the user journey, information architecture, and interface with a focus on usability and conversion.
- Simplified complex workflows for sales, card payment terminals, event bars, and administrative operations, reducing steps and friction by designing new wireframes and high-fidelity prototypes validated with the development team.
- Evolved the company's Design System and reusable component libraries, applied across 6+ digital products, including fan membership apps, a financial system, an events platform, a digital wallet, a system for client Tubarão Saneamento, and internal system overhauls, standardizing the experience across products.
- Created conversion-focused websites and landing pages, prioritizing clear calls to action (CTAs), visual hierarchy, and reduced friction in the conversion flow.
- Mentored 2 UX/UI interns, raising the technical quality of the team's output through individual coaching and ongoing portfolio reviews.
- Applied AI tools (Claude Code, ChatGPT) to speed up research, documentation, and prototyping, freeing up more team time for strategic product decisions.
- Ensured visual and functional fidelity of production releases, validating implementations side by side with the development team and reducing rework between design and code.

UX/UI Designer | Internship | Minha Entrada H2 2021

- Contributed wireframes and prototypes for apps and internal systems, supporting the development of new features under the guidance of the mid-level team.
- Took part in user research and usability testing, helping validate interfaces before development.
- Identified improvement opportunities in existing navigation flows, proposing usability adjustments to the team.

Web Developer | Internship | Minha Entrada 2020 – H1 2021

- Fixed bugs and implemented feature improvements for web systems, using HTML, CSS, JavaScript, Git, and MVC architecture.

EDUCATION

Associate Degree in Systems Analysis and Development Completed 2026

Universidade do Sul de Santa Catarina (UNISUL)

- Program completed. Diploma in issuance process.

Technical Diploma in Internet Computing | Web Programming 2018 – 2020

CEDUP Diomício Freitas

- State-run vocational technical school (Santa Catarina, Brazil), focused on algorithms, how the internet works (HTTP), relational databases, computer assembly, and teamwork.

SKILLS

UX/UI & Product Design: UX Research, UI Design, User Flows, User Journeys, Wireframing, Prototyping, Design Systems, Componentization, Atomic Design, Information Architecture, Responsive Design, Accessibility (WCAG), Usability Testing, Agile Methodologies (Scrum & Kanban), Product Strategy, Team Mentoring & Training.

Development: HTML5, CSS3, JavaScript, React & Next.js, Git/GitHub.

Additional Knowledge: LGPD (Brazilian General Data Protection Law), data privacy and protection, information security best practices.

Tools: Figma, FigJam, Claude Code, ChatGPT, VS Code.
